Auto formation of a control module for Global Caché devices. i3 lite supports Global Caché devices to control equipement via IR. (GC-12, GC-06, iTach IP2IR, iTach WF2IR are supported.) After selecting this item a window appers that offers a choice of Global Caché devices. To create a remote to cotrol a device, select one of the Global Caché devices and indicate what "output" the IR-eye or the IR-blaster is connected to. After this i3 lite will ask to enter some device data that are required to contol.
