

There are two types of object array structures in Parameters field in IR.ADVANCED\_SELECT:

- With fields Caption and Value:

```
[{  
  Caption: String, //Value that a user will see  
  Value: String //Value that will be written in the function  
}]
```

- С полем Value:

```
[{  
  Value: String //Value that a user will see and that will be written in the  
function  
}]
```
