# Module.HidePopup

to hide the popup (the analog of [IR.HidePopup](#))

**Syntax**

```
Module.HidePopup(name)
```

| input | sample | description |
|-------|--------|-------------|
| name | "MyPopup" | type: String<br>the popup name |
| **output** | | |
| - | | type: |

**Example:**

```
Module = B.getModule(ModuleID);
Module.HidePopup("MyPopup");
```

It can be used only for Remote-type popups.
