SubDevice.AddAction (without a function)

Add ab action (used in macros and rules). Parameters in brackets are not obligatory

Синтаксис

```
SubDevice.AddAction(Name, ScriptCall, Channel, [Default], [SmartID],
[AdvancedField], [Hidden])
```

Название	Пример	Описание
Name	"Power on"	type: String имя действия
ScriptCall	true	type: Boolean a feature that an action works via a function. Use true
Channel	"Channel 1"	type: String имя канала
Default	"1"	type: String A value that is set in the channel
SmartID		type: Number This parameter is not available at the moment, set null
AdvancedField	{Name, Type, ...}	type: Object, Array It is used to work with complicated actions. If AdvancedField is used, set null in Default parameter. One object or an object array can be sent in AdvancedField.
