

There are two types of structures of object array for Parameters fiel in IR.ADVANCED_SELECT:

- With Caption and Value fields:

```
[{  
  Caption: String, //Value seen only by a user  
  Value: String //Value that is written in a function  
}]
```

- With Value field:

```
[{  
  Value: String //Value seen by a user that is written in a function  
}]
```
