

## Device.RemoveListener()

to remove the device listener

### Syntax

```
Device.AddListener(event, function, [pointer]);
```

input	sample	description
function	function(data) {}	type: function the unnamed function or reference to the function
pointer	-	type: object the pointer to the object which serves the function (optional)
output		
data		type: string the received data in the byte format

### Example:

```
function print()  
{  
    IR.Log(text);  
}  
Module.GetDevice("MyDevice").RemoveListener(IR.EVENT_RECEIVE_TEXT, print);
```

When using the device listener only [driver events](#) work
