

IR.CreateDevice()

Create the BLE scanner.

Note: network scanning is launched automatically when creating the scanner (Connect())

Parameters:

Driver_ID - the driver identifier (when creating the BLE scanner Driver_ID = IR.DEVICE_BLE_SCANNER).

Response:

IR.EVENT_DEVICE_BLE_FOUND - the event that a Bluetooth device is found.

Example:

```
var scanner = IR.CreateDevice(IR.DEVICE_BLE_SCANNER) - creation of the BLE scanner.
```
