```javascript
// Refer to the wiget Setup
var setup = IR.GetItem("Setup" + moduleID);
// Add the Setup in the subdevice
      var widget = settingPopup.addWidget(setup);
// Refer to the popup of Adding subdevices
var addDevice = IR.GetItem(addDeviceName);
// Refer to the popup of Adding dimmers
var addDimmer = IR.GetItem(addDimmerName);
// Refer to the List item on the popup of free channels
var list = listFreeChannel.GetItem("listAddchannel");
// Set up the template of items of the free channels list
list.Template = 'Channel' + moduleID;
// Refer to the popup Error
var messageError = IR.GetItem(error);
// Refer to the List item on the popup Adding subdevices
var listDevice = addDevice.GetItem("listAddDevice");
// Set up the template of items of the Adding subdevices list
listDevice.Template = 'Device_template' + moduleID;
// Call required variables
var idSub;          // The variable for referring to the subdevice
var tName;           // The variable for comparing forbidden symbols
var duplicateName;  // The variable for comparing coinciding names
```
